

Ski Lift Low Voltage @ Doppelmayr CTEC June 8-9
Special ISAA pricing \$330/person - Includes Doppelmayr tuition
Seminar, break refreshments, lunches, & 1 dinner,
ISAA banquet and reception attendance. This special offer is too good to pass up!
Normal (non-ISAA registered) pricing \$550/person

Class size: Minimum 10 / Maximum 20
Registration deadline for Doppelmayr seminar ONLY May 25, 2010.
Registration processed through ISAA only!

A not-so-shocking 2-day seminar about low voltage systems designed around the needs of beginning ski lift electricians or the curious lift mechanic looking to improve their basic knowledge skill set. The seminar gets energized on the first day with basic principals and theories, electrical schematic navigation, and component identification. The charged atmosphere continues on the second day of the seminar with sessions on battery maintenance and two hands-on wiring labs. Attendees are requested to bring a hand-held volt meter if possible to assist with interactivity. Dinner with Doppelmayr CTEC staff is provided the first night. Break refreshments and lunches are provided for 2 days.
